Portfolio: <https://0xanandportfolio.vercel.app/>

1 Education

Centurion University of Technology and Management

Vizianagaram, Andhra Pradesh

Bachelor of Technology in Computer Science (Cyber Security and Blockchain Specialization) Aug 2023 – May 2027

- CGPA: 8.9/10.0
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Computer Networks, Database Management Systems, Smart Contract Architecture, Blockchain Consensus Mechanisms, Advanced Cryptography, Decentralized Application Design

2 Technical Skills

Blockchain and Smart Contract Development: Solidity, Hardhat, Truffle, OpenZeppelin, Remix IDE, Ethereum, Polygon, Sepolia/Mumbai Testnet, MetaMask, Smart Contract Security, Gas Optimization Techniques, Access Control Patterns, UUPS Proxy Pattern, EVM Internals

Web3 Integration and Libraries: Ethers.js, Web3.js, Web3 Wallet Integration, Transaction Callbacks, Error Handling, DApp Development, Blockchain Data Interactions

Frontend Development: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, User Interface Development, Component Architecture, State Management

Backend and Infrastructure: Node.js, Express.js, RESTful APIs, MySQL, Database Design, Alchemy RPC, Etherscan API and Transaction Tracing, The Graph Subgraphs, Contract Verification, Deployment Automation, Custom RPC Configuration

Security and Analysis Tools: Nmap Network Scanning, OWASP ZAP Vulnerability Analysis, Postman API Testing, Burp Suite Security Testing, Abstract Syntax Tree (AST) Analysis, CVSS Risk Classification, Threat Modeling

Development Tools and Practices: Git, GitHub, Linux, Docker, Vercel, Render, console.sol Debugging, CI/CD Integration, Agile Methodologies

3 Experience and Projects

Real-World Security Audits

Nmap, OWASP ZAP, Postman, Burp Suite

- Conducted vulnerability assessments on live web applications using Nmap network scanning and OWASP ZAP passive analysis tools for comprehensive attack surface mapping
- Analyzed phishing email samples to identify attack patterns; developed user awareness guidelines and defense strategies
- Performed API security analysis using Postman, identifying critical risks such as missing authentication, insufficient input validation, and excessive data exposure (OWASP Top 10)
- Documented findings with CVSS-based risk classification (Critical/High/Medium/Low) and actionable remediation steps in professional audit reports

Solvigil

Node.js, Express, React, Tailwind CSS, AST Analysis

solvigil-scanner.vercel.app – Production security analysis platform — [View in Portfolio](#)

- Engineered a full-stack static analysis tool using Node.js and Express to automatically detect critical security vulnerabilities in Solidity smart contracts via Abstract Syntax Tree (AST) parsing
- Developed robust detection algorithms for severe attack vectors, including Reentrancy, Access Control flaws, Unchecked Calls, and DoS vulnerabilities, categorizing risks by CVSS severity
- Designed a high-performance, responsive frontend using React and Tailwind CSS, deployed seamlessly on Vercel with integrated CORS configurations and a cloud-native backend on Render
- Implemented secure file-handling APIs and a comprehensive reporting engine that generates actionable remediation steps and interactive security audit dashboards for developers

AagesLend Finance

Solidity, Hardhat, OpenZeppelin, React, Ethers.js

aageslend-finance.vercel.app – Production DeFi lending protocol — [View in Portfolio](#)

- Built a DeFi lending protocol with full collateral management, borrowing mechanics, and an on-chain liquidation engine
- Implemented role-based access control (Admin/Lender/Borrower) using OpenZeppelin AccessControl, enforcing least-privilege permissions across all protocol actions
- Engineered health factor calculations with real-time liquidation triggers, automatically flagging positions when LTV ratio falls below 1.0
- Achieved sub-100k gas via storage packing (uint96 into single slot), inline assembly (15% bytecode reduction), and batch processing (40% transaction reduction); built React frontend with real-time dashboards and Ethers.js wallet integration with MetaMask

DecentroPay

Solidity, React, Web3.js, Polygon

decentropay.vercel.app – Production Layer 2 payment application — [View in Portfolio](#)

- Developed and deployed a decentralized payment application on Polygon Amoy testnet, enabling secure peer-to-peer cryptocurrency transactions
- Built full-stack DApp using React for frontend and Solidity smart contracts for backend logic, deployed on Vercel for production
- Implemented smart contract functionality for payment processing, transaction validation, and secure fund transfers on Layer 2 blockchain
- Integrated Web3 wallet connectivity (MetaMask) using Web3.js for seamless user authentication and transaction signing
- Optimized gas fees by deploying on Polygon network, reducing transaction costs by over 90% compared to Ethereum mainnet

Blockchain Smart Contract Development

Solidity, Hardhat, Ethereum

- Developed secure smart contracts on Ethereum blockchain during Geeks of Gurkul Hackathon focused on blockchain technology
- Gained hands-on experience with Solidity programming, smart contract deployment, gas optimization and error handling
- Learned security best practices and decentralized application architecture

Web Development and Security Training

Software Engineering, Cybersecurity, SDLC

- Completed software engineering and cybersecurity virtual experiences covering SDLC, agile methodologies, threat analysis, and security protocols

4 Achievements and Activities

- **Competitive Programming:** Solved 50+ problems on LeetCode covering data structures and algorithms
- **Hackathon Participation:** Participated in Geeks of Gurkul Hackathon focused on blockchain technology
- **Technical Workshops:** Completed hands-on workshops on JavaScript and React development
- **Blockchain Club Member:** Active member of college blockchain club, staying updated with Web3 trends

5 Certifications

- Ethereum Bootcamp – Alchemy University
- JavaScript Development Workshop Certification
- React Development Workshop Certification
